TARGET AUDIENCE
This course is intended for the following audiences:

- Developer
- Development Consultant
- IT Support
- Project Manager
Lesson 1: Describing the Processing of ABAP Programs

Lesson Objectives
After completing this lesson, you will be able to:

- Describe the SAP NetWeaver Application Server architecture
- Describe the execution of a dialog program by the ABAP runtime system
UNIT 2

ABAP Workbench

Lesson 1: Introducing the ABAP Workbench

Lesson Objectives
After completing this lesson, you will be able to:

- Describe the structure of the ABAP Repository
- Use the search tools of the ABAP Repository
- Display ABAP Repository objects with the Object Navigator

Lesson 2: Organizing ABAP Development Projects

Lesson Objectives
After completing this lesson, you will be able to:

- Describe the ABAP development infrastructure
- Create packages

Lesson 3: Developing ABAP Programs

Lesson Objectives
After completing this lesson, you will be able to:

- Create ABAP programs
- Write ABAP programs with the ABAP Editor
- Activate ABAP programs

Lesson 4: Finalizing ABAP Development Projects

Lesson Objectives
After completing this lesson, you will be able to:

- Create transactions
- Release change requests
Lesson 1: Defining Elementary Data Objects

Lesson Objectives
After completing this lesson, you will be able to:

- Compare data types and data objects

Lesson 2: Using Basic ABAP Statements

Lesson Objectives
After completing this lesson, you will be able to:

- Explain the ABAP syntax for basic programming concepts

Lesson 3: Analyzing Programs with the ABAP Debugger

Lesson Objectives
After completing this lesson, you will be able to:

- Analyze values of elementary data objects with the ABAP Debugger
UNIT 4

Modularization Techniques in ABAP

Lesson 1: Explaining Modularization

Lesson Objectives
After completing this lesson, you will be able to:

- Describe techniques of modularization

Lesson 2: Defining and Calling Subroutines

Lesson Objectives
After completing this lesson, you will be able to:

- Modularize using subroutines

Lesson 3: Calling Function Modules

Lesson Objectives
After completing this lesson, you will be able to:

- Use function modules of function groups

Lesson 4: Creating Function Modules

Lesson Objectives
After completing this lesson, you will be able to:

- Create function groups
- Create function modules

Lesson 5: Describing Business Application Programming Interfaces (BAPIs)

Lesson Objectives
After completing this lesson, you will be able to:

- Modularize using BAPIs
Lesson 6: Calling Methods of Global Classes

Lesson Objectives
After completing this lesson, you will be able to:

- Describe object-oriented programming
- Use methods of global classes
- Use instances

Lesson 7: Creating Global Classes and Static Methods

Lesson Objectives
After completing this lesson, you will be able to:

- Create simple global classes and static methods

Lesson 8: Using Local Classes

Lesson Objectives
After completing this lesson, you will be able to:

- Use local classes
Lesson 1: Using Structured Data Objects

Lesson Objectives
After completing this lesson, you will be able to:

● Define structured data objects
● Implement basic ABAP statements for structured data objects
● Analyze structured data objects in debugging mode

Lesson 2: Using Internal Tables

Lesson Objectives
After completing this lesson, you will be able to:

● Define internal tables
● Implement basic ABAP statements with internal tables
● Analyze internal tables in debugging mode
Lesson 1: Explaining Data Models

Lesson Objectives
After completing this lesson, you will be able to:

- Explain the purpose and benefits of data models
- Describe the SAP flight data model
- Explain transparent tables

Lesson 2: Retrieving Single Database Records

Lesson Objectives
After completing this lesson, you will be able to:

- Retrieve single database records

Lesson 3: Retrieving Multiple Database Records

Lesson Objectives
After completing this lesson, you will be able to:

- Implement a SELECT loop
- Implement an array fetch

Lesson 4: Describing Other Aspects of Database Access

Lesson Objectives
After completing this lesson, you will be able to:

- Retrieve client-specific data
- Use database indexes
- Explain the SAP table buffer
- Retrieve data from several database tables
- Identify ways to change data in a database table
Lesson 5: Implementing Authorization Checks

Lesson Objectives
After completing this lesson, you will be able to:

- Explain the authorization concept
- Implement authorization checks
Lesson 1: Implementing ABAP Lists

Lesson Objectives
After completing this lesson, you will be able to:

- Define ABAP list titles and column headers

Lesson 2: Implementing Selection Screens

Lesson Objectives
After completing this lesson, you will be able to:

- Describe the attributes and benefits of selection screens
- Implement options for restricting selections of selection screens

Lesson 3: Implementing Events of ABAP Reports

Lesson Objectives
After completing this lesson, you will be able to:

- Implement the events of ABAP reports
Lesson 1: Creating Screens
Lesson Objectives
After completing this lesson, you will be able to:

• Create screens and understand screen processing

Lesson 2: Creating Input and Output Fields
Lesson Objectives
After completing this lesson, you will be able to:

• Create input and output fields on screens

Lesson 3: Implementing Data Transport
Lesson Objectives
After completing this lesson, you will be able to:

• Implement data transport on screens
Lesson 1: Using the SAP List Viewer

Lesson Objectives
After completing this lesson, you will be able to:

- Describe EnjoySAP controls
- Implement an SAP List Viewer
UNIT 10
Web Dynpro ABAP

Lesson 1: Describing Web Dynpro ABAP

Lesson Objectives
After completing this lesson, you will be able to:

• Describe Web Dynpro ABAP

Lesson 2: Implementing Navigation in Web Dynpro

Lesson Objectives
After completing this lesson, you will be able to:

• Implement navigation in Web Dynpro

Lesson 3: Implementing Data Transport in Web Dynpro

Lesson Objectives
After completing this lesson, you will be able to:

• Implement data transport in Web Dynpro
Lesson 1: Improving the Quality of ABAP Code with the Code Inspector

Lesson Objectives
After completing this lesson, you will be able to:

- Describe the Code Inspector
- Use the Code Inspector
Lesson 1: Describing ABAP Development Tools for SAP NetWeaver

Lesson Objectives
After completing this lesson, you will be able to:

- Describe Eclipse-based ABAP development

Lesson 2: Creating an ABAP Project in Eclipse

Lesson Objectives
After completing this lesson, you will be able to:

- Create an ABAP project in Eclipse
Lesson 1: Adjusting the SAP Standard Software

Lesson Objectives
After completing this lesson, you will be able to:

- Explain terms for adjusting the SAP standard software
- Describe options for adjusting SAP standard software
- Describe enhancement types
