

BOCE10

SAP Crystal Reports for Enterprise: Fundamentals of Report Design

SAP BusinessObjects - Business Intelligence

Course Outline

Course Version: 96 Revision A

Course Duration: 2 Day(s)

Publication Date: 14-01-2013

Publication Time: 1457

Contents

Course Overview	v
Course Goals	v
Course Objectives	v
Unit 1: Planning a Report	1
Defining database concepts	1
Planning and developing a report prototype	1
Unit 2: Requirements to build a report	2
Log onto SAP BusinessObjects BI platform	2
Select a Data Source	2
Unit 3: Creating a Report	3
Connecting to a Data Source	3
Create a query to retrieve data from the data source	3
Using the Report Design Environment	3
Report Sections	3
Working with field objects	4
Save a report	4
Unit 4: Report Layout and Formatting	5
Setting Page properties	5
Formatting options	5
Unit 5: Selecting Data	6
Editing a query	6
Inserting additional filter conditions	6
Modifying query filters	6
Applying time based filters	6
Unit 6: Sorting, Grouping and Totaling	7
Sorting Data	7
Grouping data	7
Create nested and multiple groups	7
Create a custom group	7
Group on time-based data	8
Total grouped data	8

Total column data	8
Unit 7: Additional Report Objects.....	9
Predefined Objects	9
Graphical Objects	9
Unit 8: Formulas	10
Formulas overview.....	10
Working with the Formula Workshop.....	10
Creating and modifying formulas	10
Applying Boolean formulas	10
Applying If-Then-Else formulas	11
Applying date calculations	11
Applying numeric calculations.....	11
Applying string manipulation.....	11
Unit 9: Conditional Formatting	12
Formatting Objects conditionally.....	12
Formatting Fields conditionally with formulas	12
Formatting Sections	12
Formatting Sections conditionally.....	12
Drill down on Sections.....	13
Unit 10: Charting	14
Charting Concepts.....	14
Charting on grouped data.....	14
Creating a chart on detailed data	14
Formatting Charts.....	14
Unit 11: Distributing Reports.....	15
Exporting a report.....	15
Saving to SAP BusinessObjects Business Intelligence Platform.....	15

Course Overview

This 2-day instructor-led course on SAP Crystal Reports for Enterprise explains how to design, explore, visualize, and deliver reports. It also gives you comprehensive skills and in-depth knowledge to plan and create reports that will help you analyze and interpret data. As a business benefit, you will find that this course is an in-depth approach to the entire report creation cycle, from planning a report prototype to distributing a report.

Target Audience

This course is intended for the following audiences:

- Business Analysts
- Report Writers
- Report Designers
- Application Developers
- BI System Administrators

Course Prerequisites

Required Knowledge

- Windows conventions

Recommended Knowledge

- Basic database concepts

Course Goals

This course will prepare the participant to:

- Plan and create a report
- Organize and format data
- Apply record selection
- Create formulas and apply conditioning report
- Export and distribute reports

Course Objectives

After completing this course, the participant will be able to:

- Create, modify and enhance a Crystal Report

Unit 1

Planning a Report

Unit Overview

In this unit you will define database concepts and plan and develop a report prototype.

Lesson: Defining database concepts

Lesson Objectives

After completing this lesson, the participant will be able to:

- Define database terms

Lesson: Planning and developing a report prototype

Lesson Objectives

After completing this lesson, the participant will be able to:

- Determine the layout and content of a report
- Develop a prototype of a report
- Determine the layout and content for a report and then develop a paper prototype

Unit 2

Requirements to build a report

Unit Overview

In this unit you will learn to log onto SAP BusinessObjects BI platform and select a data source.

Lesson: Log onto SAP BusinessObjects BI platform

Lesson Objectives

After completing this lesson, the participant will be able to:

- Log onto SAP BusinessObjects BI platform

Lesson: Select a Data Source

Lesson Objectives

After completing this lesson, the participant will be able to:

- Define possible Data Sources

Unit 3

Creating a Report

Unit Overview

In this unit you will learn to connect to data sources, create queries to retrieve data, use the Report Design environment, create report sections, use field objects and save your reports.

Lesson: Connecting to a Data Source

Lesson Objectives

After completing this lesson, the participant will be able to:

- Connect to a Data Source

Lesson: Create a query to retrieve data from the data source

Lesson Objectives

After completing this lesson, the participant will be able to:

- Create a query to retrieve data from the data source
- Choose Result Objects

Lesson: Using the Report Design Environment

Lesson Objectives

After completing this lesson, the participant will be able to:

- Use the report Design Environment
- Place objects
- Work with report structure and preview mode

Lesson: Report Sections

Lesson Objectives

After completing this lesson, the participant will be able to:

- Understand the relevance of sections
- Get to know different sections

Lesson: Working with field objects

Lesson Objectives

After completing this lesson, the participant will be able to:

- Position, align and resize field objects

Lesson: Save a report

Lesson Objectives

After completing this lesson, the participant will be able to:

- Save a report as local file or save to an Enterprise folder

Unit 4

Report Layout and Formatting

Unit Overview

In this unit you will set page properties and formatting options.

Lesson: Setting Page properties

Lesson Objectives

After completing this lesson, the participant will be able to:

- Learn how to define Page properties

Lesson: Formatting options

Lesson Objectives

After completing this lesson, the participant will be able to:

- Get to know available report formatting options and how to define them

Unit 5

Selecting Data

Unit Overview

In this unit you will learn to edit queries, insert additional filter conditions, modify query filters and apply time-based filters.

Lesson: Editing a query

Lesson Objectives

After completing this lesson, the participant will be able to:

- Edit a query
- Define sorting within a query
- Set a filter within a query

Lesson: Inserting additional filter conditions

Lesson Objectives

After completing this lesson, the participant will be able to:

- Learn how to insert additional filter conditions

Lesson: Modifying query filters

Lesson Objectives

After completing this lesson, the participant will be able to:

- Modify the query filter

Lesson: Applying time based filters

Lesson Objectives

After completing this lesson, the participant will be able to:

- Apply time based filters

Unit 6

Sorting, Grouping and Totaling

Unit Overview

In this unit you will learn to sort and group data, create nested and multiple groups, create custom groups, create groups based on time-related data, and create totals for groups and columns.

Lesson: Sorting Data

Lesson Objectives

After completing this lesson, the participant will be able to:

- Sort data

Lesson: Grouping data

Lesson Objectives

After completing this lesson, the participant will be able to:

- Create and modify groups

Lesson: Create nested and multiple groups

Lesson Objectives

After completing this lesson, the participant will be able to:

- Create nested and multiple groups
- Reorder groups

Lesson: Create a custom group

Lesson Objectives

After completing this lesson, the participant will be able to:

- Add a custom group based on criteria not specified in the database

Lesson: Group on time-based data

Lesson Objectives

After completing this lesson, the participant will be able to:

- Group on time

Lesson: Total grouped data

Lesson Objectives

After completing this lesson, the participant will be able to:

- Create subtotals

Lesson: Total column data

Lesson Objectives

After completing this lesson, the participant will be able to:

- Total on column data

Unit 7

Additional Report Objects

Unit Overview

In this unit you will learn about predefined and graphical objects.

Lesson: Predefined Objects

Lesson Objectives

After completing this lesson, the participant will be able to:

- Recognize useful predefined objects and know how to insert them into a report

Lesson: Graphical Objects

Lesson Objectives

After completing this lesson, the participant will be able to:

- Create lines and boxes within a report and format them
- Insert pictures into a report

Unit 8

Formulas

Unit Overview

In this unit you will learn about formulas and how to use the formula workshop. You will learn to create and modify Boolean formulas, If-Then-Else formulas, date calculations, numeric calculations, and use string manipulation.

Lesson: Formulas overview

Lesson Objectives

After completing this lesson, the participant will be able to:

- Understand different types of formulas
- Get to know formula components
- Get to know formula syntax

Lesson: Working with the Formula Workshop

Lesson Objectives

After completing this lesson, the participant will be able to:

- Use the Formula Workshop

Lesson: Creating and modifying formulas

Lesson Objectives

After completing this lesson, the participant will be able to:

- Create, modify and duplicate formulas

Lesson: Applying Boolean formulas

Lesson Objectives

After completing this lesson, the participant will be able to:

- Understand and create Boolean formulas

Lesson: Applying If-Then-Else formulas

Lesson Objectives

After completing this lesson, the participant will be able to:

- Understand and create If-Then-Else formulas

Lesson: Applying date calculations

Lesson Objectives

After completing this lesson, the participant will be able to:

- Get to know basic date functions
- Search for functions
- Display help on functions

Lesson: Applying numeric calculations

Lesson Objectives

After completing this lesson, the participant will be able to:

- Create numeric calculations with formulas

Lesson: Applying string manipulation

Lesson Objectives

After completing this lesson, the participant will be able to:

- Get to know useful string manipulation functions

Unit 9

Conditional Formatting

Unit Overview

In this unit you will learn to format objects conditionally, format fields conditionally with formulas, format sections, format sections conditionally, and drill down on sections.

Lesson: Formatting Objects conditionally

Lesson Objectives

After completing this lesson, the participant will be able to:

- Use the Conditional Formatting Dialog
- Use Conditional formulas

Lesson: Formatting Fields conditionally with formulas

Lesson Objectives

After completing this lesson, the participant will be able to:

- Format Fields conditionally with formulas

Lesson: Formatting Sections

Lesson Objectives

After completing this lesson, the participant will be able to:

- Get to know the options available to format sections

Lesson: Formatting Sections conditionally

Lesson Objectives

After completing this lesson, the participant will be able to:

- Format sections conditionally

Lesson: Drill down on Sections

Lesson Objectives

After completing this lesson, the participant will be able to:

- Drill down on sections

Unit 10

Charting

Unit Overview

In this unit you will learn about charting concepts, how to create charts using grouped and detailed data, and how to format your chart.

Lesson: Charting Concepts

Lesson Objectives

After completing this lesson, the participant will be able to:

- Insert and create a chart

Lesson: Charting on grouped data

Lesson Objectives

After completing this lesson, the participant will be able to:

- Create a chart on grouped data

Lesson: Creating a chart on detailed data

Lesson Objectives

After completing this lesson, the participant will be able to:

- Create a chart on detailed data

Lesson: Formatting Charts

Lesson Objectives

After completing this lesson, the participant will be able to:

- Get to know the formatting options of a chart
- Apply formatting options to a chart

Unit 11

Distributing Reports

Unit Overview

In this unit you will learn how to export a report, and save it to the SAP BusinessObjects Business Intelligence Platform.

Lesson: Exporting a report

Lesson Objectives

After completing this lesson, the participant will be able to:

- Get to know the exporting formats, options and destinations for a report

Lesson: Saving to SAP BusinessObjects Business Intelligence Platform

Lesson Objectives

After completing this lesson, the participant will be able to:

- Define viewing requirements in SAP BusinessObjects Business Intelligence Platform
- Save a report to an SAP BusinessObjects Enterprise Folder
