Contents

vii **Course Overview**

1 Unit 1: Reviewing Architecture, Administration, and Security in SAP BusinessObjects BI Platform

- 1 Lesson: Describing the BI Platform Architecture, System, and System Elements
- 1 Lesson: Identifying Key Architecture Flows
- 1 Lesson: Reviewing SAP BusinessObjects BI Platform Security
- 1 Lesson: SAP BusinessObjects BI Platform Support Tool

3 Unit 2: Identifying Requirements

- 3 Lesson: Assessing your Organization's Environment

5 Unit 3: Planning a Deployment

- 5 Lesson: Identifying Factors to Consider when Deploying a BI Platform 4.2 System
- 5 Lesson: Identifying Factors that Influence the Deployment Process
- 5 Lesson: Identifying Factors to Consider when Installing SAP BusinessObjects Platform 4.2
- 5 Lesson: Identifying Factors to Consider when Configuring a Deployment

7 Unit 4: Deployment Design and Sizing

- 7 Lesson: Designing an SAP Business Intelligence Deployment
- 7 Lesson: Designing a Scalable System
- 7 Lesson: Preparing a Sizing of a BI Platform Deployment

9 Unit 5: Deployment and Configuration of an SAP Business Intelligence Platform 4.2

- 9 Lesson: Planning a Deployment Solution
- 9 Lesson: Configuring the Web Tier for High Availability
- 9 Lesson: Configuring the Management Tier for High Availability
- 9 Lesson: Configuring the Storage Tier for High Availability
- 9 Lesson: Configuring the Processing Tier for High Availability
- 10 Lesson: BI Platform Pattern Books and Best Practices for Deployment
- 10 Lesson: Administering Server Groups

11	Unit 6:	Content Management Planning
11		Lesson: Preparing to Manage Content
11		Lesson: Upgrading a Deployment
11		Lesson: Managing the Life Cycle of a Deployment
11		Lesson: Moving Objects from One Deployment to Another
13	Unit 7:	Deployment Administration
13		Lesson: Performing Advanced Troubleshooting of a BI Platform Deployment
15	Unit 8:	Deployment Replication
15		Lesson: Replicating a BI Platform Deployment
17	Unit 9:	Disaster Recovery in the SAP Business Intelligence Platform 4.2
17		Lesson: Planning for Disaster Recovery

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- System Administrator
- Systems Architect

Lesson 1: Describing the BI Platform Architecture, System, and System Elements

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the SAP strategic focus on BI
- Describe the BI suites
- Describe the BI platform system
- Describe the integration of the BI platform suite

Lesson 2: Identifying Key Architecture Flows

Lesson Objectives

After completing this lesson, you will be able to:

- Describe key architecture flows

Lesson 3: Reviewing SAP BusinessObjects BI Platform Security

Lesson Objectives

After completing this lesson, you will be able to:

- Administer security

Lesson 4: SAP BusinessObjects BI Platform Support Tool

Lesson Objectives

After completing this lesson, you will be able to:

- Describe SAP BusinessObjects BI Platform Support Tool

Lesson 1: Assessing your Organization's Environment

Lesson Objectives

After completing this lesson, you will be able to:

- Assess your organization's environment

Lesson 1: Identifying Factors to Consider when Deploying a BI Platform 4.2 System

Lesson Objectives

After completing this lesson, you will be able to:

- Identify factors to consider when designing and sizing a deployment

Lesson 2: Identifying Factors that Influence the Deployment Process

Lesson Objectives

After completing this lesson, you will be able to:

- Identify factors that influence the deployment process

Lesson 3: Identifying Factors to Consider when Installing SAP BusinessObjects Platform 4.2

Lesson Objectives

After completing this lesson, you will be able to:

- Identify factors to consider when installing a deployment

Lesson 4: Identifying Factors to Consider when Configuring a Deployment

Lesson Objectives

After completing this lesson, you will be able to:

- Identify factors to consider when configuring a deployment

Lesson 1: Designing an SAP Business Intelligence Deployment

Lesson Objectives

After completing this lesson, you will be able to:

- Describe factors that influence BI platform deployment design

Lesson 2: Designing a Scalable System

Lesson Objectives

After completing this lesson, you will be able to:

- Identify factors that influence scalability and capacity

Lesson 3: Preparing a Sizing of a BI Platform Deployment

Lesson Objectives

After completing this lesson, you will be able to:

- Define the sizing process
- Analyze the sizing capacity of system servers
- Analyze the sizing requirements of system components
- Describe factors that influence scaling
- Identify the uses of Configuration Intelligence
- Identify the uses of the BI 4 Sizing Guide
- Identify the uses of BI Virtualization
- Identify Design Studio sizing guidelines
- Perform an initial sizing of a deployment

Lesson 1: Planning a Deployment Solution

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the factors that influence a deployment solution plan
- Develop a deployment strategy for high availability

Lesson 2: Configuring the Web Tier for High Availability

Lesson Objectives

After completing this lesson, you will be able to:

- Configure the web tier for high availability.

Lesson 3: Configuring the Management Tier for High Availability

Lesson Objectives

After completing this lesson, you will be able to:

- Configure the management tier for high availability

Lesson 4: Configuring the Storage Tier for High Availability

Lesson Objectives

After completing this lesson, you will be able to:

- Configure the File Repository System (FRS)

Lesson 5: Configuring the Processing Tier for High Availability

Lesson Objectives

After completing this lesson, you will be able to:

- Configure the processing tier for high availability
- Choose a deployment template

Lesson 6: BI Platform Pattern Books and Best Practices for Deployment

Lesson Objectives

After completing this lesson, you will be able to:

- Select a pattern for a BI landscape

Lesson 7: Administering Server Groups

Lesson Objectives

After completing this lesson, you will be able to:

- Administer server groups

Lesson 1: Preparing to Manage Content

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the content management process and tools

Lesson 2: Upgrading a Deployment

Lesson Objectives

After completing this lesson, you will be able to:

- Upgrade using the Upgrade Management Tool (UMT)

Lesson 3: Managing the Life Cycle of a Deployment

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the life cycle of a deployment
- Manage the life cycle of a deployment using the Life Cycle Management (LCM) tool
- Create a new job
- Manage job dependencies
- Schedule and roll back jobs
- Identify factors that affect life cycle management
- Apply best practices for managing the life cycle of a deployment

Lesson 4: Moving Objects from One Deployment to Another

Lesson Objectives

After completing this lesson, you will be able to:

- Compare objects and files

Lesson 1: Performing Advanced Troubleshooting of a BI Platform Deployment

Lesson Objectives

After completing this lesson, you will be able to:

- Perform an end-to-end trace with SAP Passport

Lesson 1: Replicating a BI Platform Deployment

Lesson Objectives

After completing this lesson, you will be able to:

- Identify the uses of the Federation application
- Apply replication techniques and best practices

Lesson 1: Planning for Disaster Recovery

Lesson Objectives

After completing this lesson, you will be able to:

- Describe guidelines and best practices for disaster recovery
