Contents

vii **Course Overview**

1 Unit 1: Data Modeling with SAP Business Information Warehouse (SAP BW) Powered by SAP HANA

- 1 Lesson: Understanding Modeling Objectives and Issues
- 1 Lesson: Understanding SAP HANA From a Modeling Perspective
- 1 Lesson: Understanding SAP BW From a Modeling Perspective
- 1 Lesson: Comparing SAP BW with SAP HANA

3 Unit 2: Business Review

- 3 Lesson: Understanding the Relevant Skills and Exercises
- 3 Lesson: Getting to know the ItelO Case Study
- 3 Lesson: Understanding the ERP Model

5 Unit 3: Global Decision Areas and Best Practice Standards

- 5 Lesson: Planning Transport Management
- 5 Lesson: Separating Master Data and Transactional Data
- 5 Lesson: Tracking History
- 5 Lesson: Evaluating Global Standards and Local Adaptations
- 5 Lesson: Designing a Layered Scalable Architecture (LSA) With Virtual Layers
- 6 Lesson: Understanding LSA++ Domains
- 6 Lesson: Understanding Reporting Options

7 Unit 4: Process of Modeling

- 7 Lesson: Defining the Sequence of SAP BW Projects
- 7 Lesson: Planning the Phases of a SAP BW Project
- 7 Lesson: Developing a SAP BW Data Model
- 7 Lesson: Comparing a Data Model With SAP HANA Live
- 8 Lesson: Comparing a Data Model With Business Content

9 Unit 5: Field-Based Rapid Prototyping

- 9 Lesson: Implementing Field-Based Modeling

11 Unit 6: Master Data Modeling With SAP BW Characteristics

- 11 Lesson: Listing Tables in the SAP BW Data Model
- 11 Lesson: Using Reference Characteristics
- 11 Lesson: Using Hierarchies in SAP BW Characteristics

13	Unit 7:	Key Figure Modeling in SAP BW
13		Lesson: Defining Key Figures as SAP BW InfoObjects
13		Lesson: Creating Key Figures for Non-Cumulatives
15	Unit 8:	Transaction Data Modeling in SAP BW
15		Lesson: Modeling Advanced DataStore Objects (ADSOs)
15		Lesson: Creating a Data Model for Non-Cumulative Values in SAP BW
15		Lesson: Implementing Currency Harmonization
15		Lesson: Implementing Quantity Conversion
15		Lesson: Modeling Transformations
16		Lesson: Modeling a CompositeProvider
17	Unit 9:	Master Data Modeling in SAP HANA Views
17		Lesson: Modeling Master Data in SAP HANA Views
19	Unit 10:	Transaction Data Modeling With SAP HANA
19		Lesson: Modeling Transaction Data in SAP HANA Views
21	Unit 11:	Hybrid Modeling in Mixed Scenarios
21		Lesson: Understanding Mixed Scenarios for SAP BW on SAP HANA
21		Lesson: Modeling Mixed Scenarios
21		Lesson: Enhancing Views in SAP HANA
23	Unit 12:	Enhanced Scenarios in SAP BW
23		Lesson: Modeling an SAP BW Workspace
23		Lesson: Implementing an SAP HANA analysis process
25	Unit 13:	Existing Model Enhancement
25		Lesson: Using the SAP BW Remodeling Toolbox
25		Lesson: Converting Silos or LSA Models to LSA++ Models

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Technology Consultant
- Application Consultant
- Business Analyst
- Business Process Architect
- Business Process Owner/Team Lead/Power User
- Enterprise Architect
- Program/Project Manager

Lesson 1: Understanding Modeling Objectives and Issues

Lesson Objectives

After completing this lesson, you will be able to:

- Define SAP BW on SAP HANA modeling
- Identify modeling targets
- Prioritize modeling objectives
- Identify suboptimal models

Lesson 2: Understanding SAP HANA From a Modeling Perspective

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the advantages of SAP HANA from a modeling perspective
- Identify the components of a data storage strategy
- Understand Recommendations for SAP HANA

Lesson 3: Understanding SAP BW From a Modeling Perspective

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the advantages of SAP BW
- Recommend suitable modeling options

Lesson 4: Comparing SAP BW with SAP HANA

Lesson Objectives

After completing this lesson, you will be able to:

- Understand how SAP BW modeling relates to SAP HANA modeling
- Understand Mixed models

Lesson 1: Understanding the Relevant Skills and Exercises

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the relevant skills and tasks

Lesson 2: Getting to know the ItelO Case Study

Lesson Objectives

After completing this lesson, you will be able to:

- Get to know the ItelO Case Study

Lesson 3: Understanding the ERP Model

Lesson Objectives

After completing this lesson, you will be able to:

- Understand how the ERP Model separates data

Lesson 1: Planning Transport Management

Lesson Objectives

After completing this lesson, you will be able to:

- Overview the transport management system

Lesson 2: Separating Master Data and Transactional Data

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the advantages of separating master and transactional data

Lesson 3: Tracking History

Lesson Objectives

After completing this lesson, you will be able to:

- Understand Tracking History

Lesson 4: Evaluating Global Standards and Local Adaptations

Lesson Objectives

After completing this lesson, you will be able to:

- Evaluate global standards and local adaptations
- Choose an appropriate system landscape model

Lesson 5: Designing a Layered Scalable Architecture (LSA) With Virtual Layers

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the integration and adaptation of data
- Understand the history of Enterprise Data Warehouse architecture

- Understand the purpose of SAP BW layers
- Recommend a typical LSA++

Lesson 6: Understanding LSA++ Domains

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the purpose of domains

Lesson 7: Understanding Reporting Options

Lesson Objectives

After completing this lesson, you will be able to:

- Understand report navigation

Lesson 1: Defining the Sequence of SAP BW Projects

Lesson Objectives

After completing this lesson, you will be able to:

- Define a sequence of SAP BW projects

Lesson 2: Planning the Phases of a SAP BW Project

Lesson Objectives

After completing this lesson, you will be able to:

- List the five phases of a SAP BW project
- Understand the preparation phase
- Understand the business blueprint phase
- Understand the realization phase
- Understand the final preparation phase
- Understand the go live and support phase
- Understand Agile Methods

Lesson 3: Developing a SAP BW Data Model

Lesson Objectives

After completing this lesson, you will be able to:

- Structure the process of data model creation in the business blueprint phase
- Perform a requirement analysis
- Create an architecture overview
- Create a logical data model
- Develop an SAP BW data model

Lesson 4: Comparing a Data Model With SAP HANA Live

Lesson Objectives

After completing this lesson, you will be able to:

- Get an overview of SAP HANA live
- Improve an existing SAP HANA live view

Lesson 5: Comparing a Data Model With Business Content

Lesson Objectives

After completing this lesson, you will be able to:

- Compare a data model with business content

Lesson 1: Implementing Field-Based Modeling

Lesson Objectives

After completing this lesson, you will be able to:

- Create an Open Operational Data Store (ODS) view
- Turn an ODS view into a field-based Advanced DataStore Object (ADSO)

Lesson 1: Listing Tables in the SAP BW Data Model

Lesson Objectives

After completing this lesson, you will be able to:

- List the tables in the SAP BW data model

Lesson 2: Using Reference Characteristics

Lesson Objectives

After completing this lesson, you will be able to:

- Use reference characteristics

Lesson 3: Using Hierarchies in SAP BW Characteristics

Lesson Objectives

After completing this lesson, you will be able to:

- Use hierarchies

Lesson 1: Defining Key Figures as SAP BW InfoObjects

Lesson Objectives

After completing this lesson, you will be able to:

- Define key figures

Lesson 2: Creating Key Figures for Non-Cumulatives

Lesson Objectives

After completing this lesson, you will be able to:

- Create key figures for non-cumulatives

Lesson 1: Modeling Advanced DataStore Objects (ADSOs)

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the function of ADSOs for the core EDW layer
- Create ADSOs for the core EDW layer

Lesson 2: Creating a Data Model for Non-Cumulative Values in SAP BW

Lesson Objectives

After completing this lesson, you will be able to:

- Create a data model for non-cumulative values

Lesson 3: Implementing Currency Harmonization

Lesson Objectives

After completing this lesson, you will be able to:

- Create translation types for currency translation

Lesson 4: Implementing Quantity Conversion

Lesson Objectives

After completing this lesson, you will be able to:

- Create translation types for quantity conversion

Lesson 5: Modeling Transformations

Lesson Objectives

After completing this lesson, you will be able to:

- Transform data during the BW ETL Process
- Perform currency and unit conversion

Lesson 6: Modeling a Composite Provider

Lesson Objectives

After completing this lesson, you will be able to:

- Design Composite Providers

Lesson 1: Modeling Master Data in SAP HANA Views

Lesson Objectives

After completing this lesson, you will be able to:

- Create SAP HANA views with hierarchies

Lesson 1: Modeling Transaction Data in SAP HANA Views

Lesson Objectives

After completing this lesson, you will be able to:

- Create SAP HANA views with measures
- Integrate CompositeProviders with HANA Views and aDSOs

Lesson 1: Understanding Mixed Scenarios for SAP BW on SAP HANA

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the combination of SAP BW and SAP HANA models
- Differentiate scenarios for SAP BW on SAP HANA

Lesson 2: Modeling Mixed Scenarios

Lesson Objectives

After completing this lesson, you will be able to:

- Generate views

Lesson 3: Enhancing Views in SAP HANA

Lesson Objectives

After completing this lesson, you will be able to:

- Enhance views

Lesson 1: Modeling an SAP BW Workspace

Lesson Objectives

After completing this lesson, you will be able to:

- Understand SAP BW workspaces
- Report on locally managed data

Lesson 2: Implementing an SAP HANA analysis process

Lesson Objectives

After completing this lesson, you will be able to:

- Implement an SAP HANA analytic process

Lesson 1: Using the SAP BW Remodeling Toolbox

Lesson Objectives

After completing this lesson, you will be able to:

- Remodel an InfoObject

Lesson 2: Converting Silos or LSA Models to LSA++ Models

Lesson Objectives

After completing this lesson, you will be able to:

- Define a strategy for conversion to LSA++
- Convert legacy infocubes
- Convert legacy multiproviders
- Streamline the EDW Core
