vii Course Overview

1 Unit 1: Fundamentals

1	Lesson: What is the Difference Between SQL and SQLScript?
1	Lesson: Explaining SAP HANA XS Advanced and SAP HANA Deployment Infrastructure (HDI)
1	Lesson: Understanding HDI and Working with the Database Explorer
1	Lesson: Describing the SAP HANA Database Module
1	Lesson: Working with the SAP Web IDE for SAP HANA
2	Lesson: Understanding the Course Data

3 Unit 2: SQL - Refreshing the Essentials

3	Lesson: Understanding Motivation and Basic Concepts
3	Lesson: Using Data from a Table or View
3	Lesson: Understanding NULL Values
3	Lesson: Aggregating Data
4	Lesson: Understanding Unions and Joins
4	Lesson: Changing Data Stored in Tables

5 Unit 3: SQL Logic Containers

5	Lesson: Creating User-Defined Functions
5	Lesson: Creating Database Procedures
5	Lesson: Trapping Errors in SQLScript
5	Lesson: Creating User-Defined Libraries

7 Unit 4: Declarative Logic

7	Lesson: Using Declarative Logic
---	---------------------------------

9 Unit 5: Imperative Logic

9	Lesson: Implementing Imperative Logic
---	---------------------------------------

11 Unit 6: Temporal Tables

11	Lesson: Working with Temporal Tables
----	--------------------------------------

13 Unit 7: OLAP Operations

13	Lesson: Using OLAP Analytic Features
----	--------------------------------------

15 Unit 8: Hierarchies

15	Lesson: Working with Hierarchies
----	----------------------------------

17 Unit 9: Troubleshooting and Best Practices

17 Lesson: Understanding Tools for Troubleshooting

17 Lesson: Following Best Practices

19 Unit 10: Appendix - SQL Fast Track

19 Lesson: Using Sub Queries

19 Lesson: Defining How Data Is Stored

19 Lesson: Using Views for Data Access

19 Lesson: Defining Data Access

19 Lesson: Explaining Database Transactions

Course Overview

TARGET AUDIENCE

This course is intended for the following audiences:

- Application Consultant
- Development Consultant
- Technology Consultant
- Database Administrator
- Developer

Lesson 1: What is the Difference Between SQL and SQLScript?

Lesson Objectives

After completing this lesson, you will be able to:

- Understand SQL
- Understand how SQLScript extends SQL

Lesson 2: Explaining SAP HANA XS Advanced and SAP HANA Deployment Infrastructure (HDI)

Lesson Objectives

After completing this lesson, you will be able to:

- Understand XS advanced and HDI

Lesson 3: Understanding HDI and Working with the Database Explorer

Lesson Objectives

After completing this lesson, you will be able to:

- Understand HDI and work with the Database Explorer

Lesson 4: Describing the SAP HANA Database Module

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the SAP HANA Database Module

Lesson 5: Working with the SAP Web IDE for SAP HANA

Lesson Objectives

After completing this lesson, you will be able to:

- Introduce the SAP Web IDE for SAP HANA

- Introduce the SQL Console of SAP Web IDE for SAP HANA

Lesson 6: Understanding the Course Data

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the sample database used throughout the course

Lesson 1: Understanding Motivation and Basic Concepts

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the motivation for and foundation of the relational model
- Understand SQL and its relationship to the relational model
- Understand database tables as the most important database objects

Lesson 2: Using Data from a Table or View

Lesson Objectives

After completing this lesson, you will be able to:

- Write simple database queries using SQL's SELECT statement and project columns in and out of queries using the SELECT clause
- Calculate column values, use built-in functions and the CASE expression in column lists
- Avoid duplicates in SELECT statement result sets
- Limit results sets to a given number of rows and browse through result sets
- Ensure a specific order in result sets
- Restrict the result set using the WHERE clause

Lesson 3: Understanding NULL Values

Lesson Objectives

After completing this lesson, you will be able to:

- Interpret NULL values in databases and understand why their presence can lead to unexpected query results

Lesson 4: Aggregating Data

Lesson Objectives

After completing this lesson, you will be able to:

- List the most important aggregate functions supported by HANA and use them to determine aggregated values on table columns using a single SELECT statement
- Determine aggregated values for groups of rows, using the GROUP BY clause
- Filter groups using the HAVING clause

Lesson 5: Understanding Unions and Joins

Lesson Objectives

After completing this lesson, you will be able to:

- Read data from multiple tables
- List the various types of JOIN constructs and use the appropriate JOIN construct to combine data from several tables using a single query

Lesson 6: Changing Data Stored in Tables

Lesson Objectives

After completing this lesson, you will be able to:

- Add rows to database tables using SQL
- Change existing rows of a database table
- Remove existing rows from a database table

Lesson 1: Creating User-Defined Functions

Lesson Objectives

After completing this lesson, you will be able to:

- Create and use scalar and table user-defined functions

Lesson 2: Creating Database Procedures

Lesson Objectives

After completing this lesson, you will be able to:

- Create and use database procedures in SAP HANA

Lesson 3: Trapping Errors in SQLScript

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the need to trap errors
- Define customized error conditions
- Control program flow to deal with errors

Lesson 4: Creating User-Defined Libraries

Lesson Objectives

After completing this lesson, you will be able to:

- Create User-Defined Libraries

Lesson 1: Using Declarative Logic

Lesson Objectives

After completing this lesson, you will be able to:

- Use declarative logic

Lesson 1: Implementing Imperative Logic

Lesson Objectives

After completing this lesson, you will be able to:

- Implement imperative logic

Lesson 1: Working with Temporal Tables

Lesson Objectives

After completing this lesson, you will be able to:

- Work with temporal tables

Lesson 1: Using OLAP Analytic Features

Lesson Objectives

After completing this lesson, you will be able to:

- Introduce OLAP analytic features
- Use SQL Group By features
- Use window framing in SQL

Lesson 1: Working with Hierarchies

Lesson Objectives

After completing this lesson, you will be able to:

- Understand the basics of hierarchies

Lesson 1: Understanding Tools for Troubleshooting

Lesson Objectives

After completing this lesson, you will be able to:

- Understand how to use tools for troubleshooting SQLScript

Lesson 2: Following Best Practices

Lesson Objectives

After completing this lesson, you will be able to:

- Follow best practices for writing SQLScript

Lesson 1: Using Sub Queries

Lesson Objectives

After completing this lesson, you will be able to:

- Read data using sub queries

Lesson 2: Defining How Data Is Stored

Lesson Objectives

After completing this lesson, you will be able to:

- List the most important data types SAP HANA supports
- Create new database tables in HANA
- Change tables by adding, removing or renaming columns

Lesson 3: Using Views for Data Access

Lesson Objectives

After completing this lesson, you will be able to:

- Describe the use cases for and advantages of using database views, define database views and use them in queries

Lesson 4: Defining Data Access

Lesson Objectives

After completing this lesson, you will be able to:

- Understand database schemas and access tables in other schemas
- Explain when database indexes make sense in SAP HANA and create and delete indexes using SQL

Lesson 5: Explaining Database Transactions

Lesson Objectives

After completing this lesson, you will be able to:

- Explain database transactions and the ACID requirements
- Finish database transactions in SAP HANA using SQL statements
- Describe issues that arise if transactions are not mutually isolated
- Understand and control isolation levels of transactions and how SAP HANA handles concurrency
