</table>
TARGET AUDIENCE
This course is intended for the following audiences:

- Application Consultant
- Support Consultant
- Project Manager
- Business User
Lesson 1: Positioning Logistics Execution Within SAP ERP Central Component

Lesson Objectives
After completing this lesson, you will be able to:

- Position Logistics Execution within SAP ERP Central Component

Lesson 2: Describing the Main Features of Warehouse Management in Logistics Execution

Lesson Objectives
After completing this lesson, you will be able to:

- Discuss the main features of Warehouse Management in Logistics Execution
Lesson 1: Creating Organizational Units for Warehouse Management (LE-WM)

Lesson Objectives
After completing this lesson, you will be able to:

- Create organizational units for Warehouse Management (LE-WM)

Lesson 2: Creating Storage Bins as Warehouse Management System (WMS) Master Records

Lesson Objectives
After completing this lesson, you will be able to:

- Create storage bin master records

Lesson 3: Connecting Warehouse Management (LE-WM) to Inventory Management (MM-IM)

Lesson Objectives
After completing this lesson, you will be able to:

- Connect Warehouse Management (LE-WM) to Inventory Management (MM-IM)

Lesson 4: Defining Quants

Lesson Objectives
After completing this lesson, you will be able to:

- Define quants
Lesson 1: Using Movement Types in Warehouse Management (LE-WM)

Lesson Objectives
After completing this lesson, you will be able to:

• Use movement types in Warehouse Management (LE-WM)

Lesson 2: Creating Transfer Orders in the Background Management

Lesson Objectives
After completing this lesson, you will be able to:

• Create transfer orders in the background

Lesson 3: Using Special Movement Indicators

Lesson Objectives
After completing this lesson, you will be able to:

• Use special movement indicators

Lesson 4: Setting Up Storage Location Control

Lesson Objectives
After completing this lesson, you will be able to:

• Set up storage location control
Lesson 1: Setting Up the Putaway Process
Lesson Objectives
After completing this lesson, you will be able to:

- Set up the putaway process

Lesson 2: Using Preconfigured Putaway Strategies
Lesson Objectives
After completing this lesson, you will be able to:

- Use preconfigured putaway strategies

Lesson 3: Adjusting Material Master Data to Control Putaway
Lesson Objectives
After completing this lesson, you will be able to:

- Adjust material master data to control putaway

Lesson 4: Executing Capacity Checks
Lesson Objectives
After completing this lesson, you will be able to:

- Execute capacity checks

Lesson 5: Performing Quality Checks in the Warehouse
Lesson Objectives
After completing this lesson, you will be able to:

- Perform quality checks in the warehouse
Lesson 1: Setting Up the Stock Removal Process

Lesson Objectives
After completing this lesson, you will be able to:

● Set up the stock removal process

Lesson 2: Using Preconfigured Stock Removal Strategies

Lesson Objectives
After completing this lesson, you will be able to:

● Use preconfigured stock removal strategies

Lesson 3: Setting Indicators to Control Stock Removal

Lesson Objectives
After completing this lesson, you will be able to:

● Set indicators to control stock removal

Lesson 4: Setting Up Batch Determination

Lesson Objectives
After completing this lesson, you will be able to:

● Set up batch determination
Lesson 1: Using Inbound Deliveries for Putaway

Lesson Objectives
After completing this lesson, you will be able to:

• Use inbound deliveries for putaway

Lesson 2: Using Outbound Deliveries for Goods Issue Processes

Lesson Objectives
After completing this lesson, you will be able to:

• Use outbound deliveries for goods issue processes

Lesson 3: Using Special Procedures for Stock Removal with Outbound Deliveries

Lesson Objectives
After completing this lesson, you will be able to:

• Use two-step picking
• Return picked material to storage
Lesson 1: Posting Changes

Lesson Objectives
After completing this lesson, you will be able to:

- Perform posting changes

Lesson 2: Performing Stock Transfers Within the Warehouse

Lesson Objectives
After completing this lesson, you will be able to:

- Perform stock transfers within the warehouse

Lesson 3: Setting Up Replenishment Control

Lesson Objectives
After completing this lesson, you will be able to:

- Set up replenishment control
Lesson 1: Discussing Internal Procurement Processes (Process Flow)

Lesson Objectives
After completing this lesson, you will be able to:

• Discuss internal procurement processes

Lesson 2: Setting Up Material Staging (Process Control)

Lesson Objectives
After completing this lesson, you will be able to:

• Set up material staging
Lesson 1: Configuring the Warehouse Activity Monitor

Lesson Objectives
After completing this lesson, you will be able to:

• Configure the warehouse activity monitor

Lesson 2: Using the Warehouse Activity Monitor

Lesson Objectives
After completing this lesson, you will be able to:

• Use the warehouse activity monitor
Lesson 1: Using Physical Inventory Procedures

Lesson Objectives
After completing this lesson, you will be able to:

- Use physical inventory procedures

Lesson 2: Processing a Physical Inventory

Lesson Objectives
After completing this lesson, you will be able to:

- Process a physical inventory
Lesson 1: Setting Up a New Warehouse in SAP ERP Central Component (SAP ECC)

Lesson Objectives
After completing this lesson, you will be able to:

- Set up a new warehouse in SAP ERP Central Component (SAP ECC)

Lesson 2: Setting Up Warehouse Processes

Lesson Objectives
After completing this lesson, you will be able to:

- Set up warehouse processes
