# Contents

vii **Course Overview**

**1 Unit 1: SAP ERP Integration for Order Management**

1 Lesson: Describing Transportation Requirements

**3 Unit 2: Master Data Integration**

3 Lesson: Integrating SAP ERP Master Data with SAP TM

3 Lesson: Evaluating Master Data in SAP TM

**5 Unit 3: Integration of Transportation Requirements**

5 Lesson: Preparing SAP TM for Integration of Transportation Requirements

5 Lesson: Preparing SAP ERP for Integration of Transportation Requirements

5 Lesson: Integrating Sales Orders and Deliveries into SAP TM

5 Lesson: Generating Transportation Requirements in SAP TM

5 Lesson: Integrating Purchase Orders into SAP TM

6 Lesson: Integrating Scheduling Agreements into SAP TM

**7 Unit 4: Transportation Requirement Processing**

7 Lesson: Integrating Routing Information from SAP ERP

7 Lesson: Retaining Consistency Across Systems

7 Lesson: Scheduling Sales Orders with SAP TM

**9 Unit 5: Delivery Integration with SAP TM**

9 Lesson: Triggering Delivery Creation from SAP TM

9 Lesson: Updating and Splitting Deliveries

9 Lesson: Managing Blocks

9 Lesson: Integrating Handling Units

**11 Unit 6: Transportation Demands for Planning**

11 Lesson: Building Freight Units

11 Lesson: Building Packages

**13 Unit 7: Transportation Planning**

13 Lesson: Defining the Transportation Planning Process

13 Lesson: Evaluating Freight Units

13 Lesson: Creating Freight Orders for Shipping

<b>15</b>	<b>Unit 8:</b>	<b>SAP Transportation Management Transportation Network</b>
15		Lesson: Integrating SAP ERP Master Data with SAP TM
15		Lesson: Evaluating Location Masters
15		Lesson: Creating Transportation Zones
15		Lesson: Defining Methods of Transportation
16		Lesson: Defining Transportation Lanes
16		Lesson: Creating Carrier Profiles
16		Lesson: Examining Resources in SAP TM
<b>17</b>	<b>Unit 9:</b>	<b>Conditions and Incompatibilities</b>
17		Lesson: Defining Conditions in SAP TM
17		Lesson: Identifying Incompatibilities
<b>19</b>	<b>Unit 10:</b>	<b>Transportation Planning Preparation</b>
19		Lesson: Examining Optimizer Planning
19		Lesson: Defining Selection Profiles
19		Lesson: Creating Planning Profiles
19		Lesson: Creating Capacity Selection Settings
<b>21</b>	<b>Unit 11:</b>	<b>Interactive Planning with the Transportation Cockpit</b>
21		Lesson: Customizing the Transportation Cockpit Layout
21		Lesson: Customizing the Transportation Cockpit
21		Lesson: Performing Interactive Planning
21		Lesson: Examining Freight Order Scheduling
<b>23</b>	<b>Unit 12:</b>	<b>Carrier Selection</b>
23		Lesson: Performing Carrier Selection
23		Lesson: Tendering Freight Orders

# Course Overview

## **TARGET AUDIENCE**

This course is intended for the following audiences:

- Application Consultant
- Business Process Architect

## Lesson 1: Describing Transportation Requirements

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe outbound and inbound transportation requirements

## Lesson 1: Integrating SAP ERP Master Data with SAP TM

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe how the CIF transfers master data to TM

## Lesson 2: Evaluating Master Data in SAP TM

### Lesson Objectives

After completing this lesson, you will be able to:

- Examine master data in SAP TM

## Lesson 1: Preparing SAP TM for Integration of Transportation Requirements

### Lesson Objectives

After completing this lesson, you will be able to:

- Define transportation requirement types

## Lesson 2: Preparing SAP ERP for Integration of Transportation Requirements

### Lesson Objectives

After completing this lesson, you will be able to:

- Activate SAP ERP order and delivery integration

## Lesson 3: Integrating Sales Orders and Deliveries into SAP TM

### Lesson Objectives

After completing this lesson, you will be able to:

- Configure output types for integration into SAP TM

## Lesson 4: Generating Transportation Requirements in SAP TM

### Lesson Objectives

After completing this lesson, you will be able to:

- Explain the process of generating transportation requirements in SAP TM from sales orders in SAP ERP
- Describe the impact of changes to the shipping condition

## Lesson 5: Integrating Purchase Orders into SAP TM

### Lesson Objectives

After completing this lesson, you will be able to:

- Create a purchase order in SAP ERP and identify requirements for integration into SAP TM

## **Lesson 6: Integrating Scheduling Agreements into SAP TM**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Explain the generation of transportation requirements in SAP TM from scheduling agreements in SAP ERP

## Lesson 1: Integrating Routing Information from SAP ERP

### Lesson Objectives

After completing this lesson, you will be able to:

- Determine routing based on Incoterms

## Lesson 2: Retaining Consistency Across Systems

### Lesson Objectives

After completing this lesson, you will be able to:

- Manage cross-system visibility
- Manage cross-system changes

## Lesson 3: Scheduling Sales Orders with SAP TM

### Lesson Objectives

After completing this lesson, you will be able to:

- Schedule sales orders

## Lesson 1: Triggering Delivery Creation from SAP TM

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe delivery documents
- Create a delivery

## Lesson 2: Updating and Splitting Deliveries

### Lesson Objectives

After completing this lesson, you will be able to:

- Update and split a delivery

## Lesson 3: Managing Blocks

### Lesson Objectives

After completing this lesson, you will be able to:

- Explain the interaction of SAP ERP and SAP TM in case of blocks

## Lesson 4: Integrating Handling Units

### Lesson Objectives

After completing this lesson, you will be able to:

- Manage handling units and packaging material requirements in SAP ERP deliveries
- Integrate handling units in SAP TM

## Lesson 1: Building Freight Units

### Lesson Objectives

After completing this lesson, you will be able to:

- Define freight unit types
- Create freight units and freight unit building rules

## Lesson 2: Building Packages

### Lesson Objectives

After completing this lesson, you will be able to:

- Create freight units with packages

## Lesson 1: Defining the Transportation Planning Process

### Lesson Objectives

After completing this lesson, you will be able to:

- Identify the business process and documentation required for transportation planning

## Lesson 2: Evaluating Freight Units

### Lesson Objectives

After completing this lesson, you will be able to:

- Examine freight unit management of individual shipping requirements

## Lesson 3: Creating Freight Orders for Shipping

### Lesson Objectives

After completing this lesson, you will be able to:

- Create freight orders

## Lesson 1: Integrating SAP ERP Master Data with SAP TM

### Lesson Objectives

After completing this lesson, you will be able to:

- Examine the transfer of master data from the Core Interface to SAP TM
- Integrate customer master data

## Lesson 2: Evaluating Location Masters

### Lesson Objectives

After completing this lesson, you will be able to:

- Examine locations in SAP TM
- Examine customers in SAP TM
- Examine vendors in SAP TM
- Examine business partners in SAP TM
- Evaluate shipping points in SAP TM
- Evaluate geocoding locations in SAP TM

## Lesson 3: Creating Transportation Zones

### Lesson Objectives

After completing this lesson, you will be able to:

- Create transportation zones
- Create transportation zone hierarchies

## Lesson 4: Defining Methods of Transportation

### Lesson Objectives

After completing this lesson, you will be able to:

- Define transportation modes
- Define means of transport

## **Lesson 5: Defining Transportation Lanes**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Create a transportation lane
- Examine transportation lane application during transportation planning

## **Lesson 6: Creating Carrier Profiles**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Examine the purpose of carrier profiles
- Examine product and transportation groups
- Examine equipment groups and equipment types
- Create carrier profiles

## **Lesson 7: Examining Resources in SAP TM**

### **Lesson Objectives**

After completing this lesson, you will be able to:

- Apply calendar resources
- Apply handling resources
- Apply vehicle resources

## Lesson 1: Defining Conditions in SAP TM

### Lesson Objectives

After completing this lesson, you will be able to:

- Examine conditions

## Lesson 2: Identifying Incompatibilities

### Lesson Objectives

After completing this lesson, you will be able to:

- Identify the purpose of incompatibilities
- Create incompatibility definitions
- Create incompatibility settings

## Lesson 1: Examining Optimizer Planning

### Lesson Objectives

After completing this lesson, you will be able to:

- Analyze the transportation planning process in SAP TM
- Examine optimizer planning

## Lesson 2: Defining Selection Profiles

### Lesson Objectives

After completing this lesson, you will be able to:

- Define selection profiles
- Create a geographical selection profile
- Create time selection profiles
- Create additional selection profiles

## Lesson 3: Creating Planning Profiles

### Lesson Objectives

After completing this lesson, you will be able to:

- Examine planning profiles
- Examine planning strategies
- Create a strategy

## Lesson 4: Creating Capacity Selection Settings

### Lesson Objectives

After completing this lesson, you will be able to:

- Create capacity selection settings

## Lesson 1: Customizing the Transportation Cockpit Layout

### Lesson Objectives

After completing this lesson, you will be able to:

- Identify profile and layout set usage in the transportation cockpit
- Create a profile and layout set

## Lesson 2: Customizing the Transportation Cockpit

### Lesson Objectives

After completing this lesson, you will be able to:

- Identify the settings required to customize the transportation cockpit

## Lesson 3: Performing Interactive Planning

### Lesson Objectives

After completing this lesson, you will be able to:

- Create freight orders using drag and drop
- Create freight orders using the command line
- Create freight orders using the interactive map
- Perform interactive planning

## Lesson 4: Examining Freight Order Scheduling

### Lesson Objectives

After completing this lesson, you will be able to:

- Identify freight order scheduling options
- Examine the optimizer planning log

## Lesson 1: Performing Carrier Selection

### Lesson Objectives

After completing this lesson, you will be able to:

- Define the parameters of the carrier selection process
- Manage carrier constraints and allocations
- Edit carrier selection settings
- Execute carrier selection

## Lesson 2: Tendering Freight Orders

### Lesson Objectives

After completing this lesson, you will be able to:

- Describe the freight tendering process
- Tender a freight order
- Describe communication methods for tendering
